

Carbon Reduction Plan Template

Supplier name: Norfolk Catering Ltd.....

Publication date: 06.06.2026.....

Commitment to achieving Net Zero

Norfolk Catering Ltd. is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2023	
Additional Details relating to the Baseline Emissions calculations.	
This organization has not previously assessed or reported emissions. Our first reporting period and Baseline Year was 2023.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	Transport of products to the end user or retailer – Litres of Diesel Used x 2.68kg/LITRE of CO ₂ (Source Michelin.com) = 16.172 x 2.68 = 43,341 kg CO ₂ /annum
Scope 2	Electricity consumed in offices and Production and storage - Lighting, Heating and Chilling of Cold Rooms and Freezers – Annual consumption of 60,000 kwh with CO ₂ Emissions of 0g/kwh based on 100% Renewable Fuel Source equivalent to kg of CO ₂ (Source YU ENERGY Fuel Mix)
Scope 3 (Included Sources)	4. Upstream Transportation and Distribution. Goods used in the production of products, Tier 1 Suppliers – Unknown. Yet to be Established 5. Waste Generated in Operations – 14.1 Tonnes of Waste YTD. 100% Diverted from Landfill. 76.41% of Waste Recycled – Emissions of Waste

	Management Suppliers (Veolia) during disposal or treatment or from transportation of waste Unknown. To be established by end of 2023. (Source Veolia UK) 6. Business Travel – Zero to Minimal – Unknown – To be established by end 2023 7. Employee Commuting – Unknown – To be established by end of 2023 9. Downstream Transportation and Distribution – N/A as sold to end user.
Total Emissions	Unknown to be finalized by end of 2023 to establish baseline year

Current Emissions Reporting

Reporting Year: 2025	
EMISSIONS	TOTAL (tCO _{2e})
Scope 1	Transport of products to the end user or retailer – Litres of Diesel Used x 2.68kg/LITRE of CO ₂ (Source Michelin.com) = 11,798 x 2.68 = 31.618 kg CO ₂ /annum
Scope 2	Electricity consumed in offices and Production and storage - Lighting, Heating and Chilling of Cold Rooms and Freezers – Annual consumption of 60,000 kwh with CO ₂ Emissions of 0g/kwh based on 100% Renewable Fuel Source equivalent to kg of CO ₂ (Source YU ENERGY Fuel Mix)
Scope 3 (Included Sources)	4. Upstream Transportation and Distribution. Goods used in the production of products, Tier 1 Suppliers – Unknown. Yet to be Established. 5. Waste Generated in Operations – 12 Tonnes of Waste YTD. 100% Diverted from Landfill. 81.74% of Waste Recycled – Emissions of Waste Management Suppliers (Veolia) during disposal or treatment or from transportation of waste Unknown. To be established by end of 2023. (Source Veolia UK) 6. Business Travel – Zero to Minimal – Unknown – To be established by end 2026 7 Employee Commuting – Unknown – To be established by end of 2026 8. Downstream Transportation and Distribution – Zero – Products sold to end user at point of sale.

Total Emissions 2025	31.618

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

In 2025 we have already practically achieved our 2030 target of 30 tCO₂e, 5 years ahead of schedule. We project that carbon emissions will decrease further over the next five years to 25 tCO₂e by 2030. This is a reduction of 20% and comfortable ahead of target.

Progress against targets can be seen in the graph below:

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2023 baseline. The carbon emission reduction achieved by these schemes equate to 1.35 tCO₂e from Waste Management and an estimated 10.37 tCO₂e from the other measures, a 27%ge reduction against the 2023 baseline and the measures will be in effect when performing the contract

Details of some of our completed carbon reduction projects are.

- Conversion of All premises lighting to LED.
- ZERO Carbon Fuel Mix supplies from our Electricity provider SmartestEnergy
- Replacement of old refrigeration units with modern efficient chillers.
- Replacement of old vehicles by new vehicles with smaller engines and improved fuel efficiency.
- Segregation of Waste to achieve over 80% recycling and Zero waste to landfill.

In the future we hope to implement further measures such as:

Electrification of our fleet. Currently electrified chilled distribution fleet are hampered by very low battery range limiting any viable commercial application. Hopefully this will change with development in battery technology.

Migration of all packaging to cardboard.

Working closer with Scope 3 Emissions contributors that can positively affect a reduction in our indirect CO2 emissions.

Consider Environmental Management Certification.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard⁴ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting⁵.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard⁶.

⁴<https://ghgprotocol.org/corporate-standard>

⁵<https://www.gov.uk/government/collections/government-conversion-factors-for-company-reporting>

⁶<https://ghgprotocol.org/standards/scope-3-standard>

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
